

Black Pantone 248 Pantone 322

Test spa or hot tub for a pH level from 7.4 to 7.8 by using a reliable test kit. If pH tests above 7.8, add this product after determining the total alkalinity of the spa water is in the acceptable range (consult your dealer).

If pH measures 7.8 to 8.0 add one heaping tablespoon per 500 gallons of water. If pH measures 8.0 to 8.4, add two heaping tablespoons. If pH measures above 8.4, add three level tablespoons.

Predissolve this product in a plastic bucket, then add to spa. Allow the water to circulate for 15 to 20 minutes. Retest the pH and repeat treatment if necessary. Do not add near the metal fittings of your spa. Do not allow pH to drop below 7.2. Use a brush or agitation to break up any undissolved lumps of this product.

**DANGER
CAUSES SEVERE EYE BURNS**

This product contains sodium bisulfate. Avoid contact with skin, eyes or clothing. Do not mix with household or other chemicals. Do not mix directly with other spa chemicals.

FIRST AID

External: Immediately flush with water for 15 minutes. If burns occur obtain medical attention. Internal: Drink large quantities of water or milk. Follow with milk of magnesia, vegetable oil or beaten eggs. DO NOT INDUCE VOMITING. Call a physician immediately. Eyes: Flush immediately with water for 15 minutes lifting eyelids to thoroughly flush. Get prompt medical attention.

STORAGE AND DISPOSAL

Store in a tightly closed container in a cool, dry place. When container is empty, do not reuse. Wrap container and place in trash collection or approved landfill.

**DANGER
KEEP OUT OF REACH OF CHILDREN**

pH minus

- Lowers pH in spa water
