<p data-bbox="373 659 674 688">Clean & Rinse Area</p> <p data-bbox="275 743 772 773">Surface must be relatively clean.</p> <p data-bbox="289 834 758 902">Pour InvisaTread™ liberally on Surface</p>	<p data-bbox="831 659 1289 727">Agitate InvisaTread™ liberally with a sponge or mop.</p> <p data-bbox="879 789 1241 867">Let stand for 5 – 15min. Depending on surface.</p> <p data-bbox="816 883 1304 951">*Area must remain moist during curing process</p> <p data-bbox="816 967 1304 1068">**Glazed surfaces may require 2 applications and a longer curing time</p>	<p data-bbox="1377 659 1814 727">Wipe off residue and rinse thoroughly with Clean Water</p> <p data-bbox="1360 828 1831 857">Area may be used immediately</p>

Application Instructions

After Treatment Care:

1. Clean normally
2. Do not wax (Wax fills in the enhanced tread created by InvisaTread™.)
When applying to marble, a small area should be tested first. Marble is unique in nature and porous, in some cases treatment may only require 2 – 3 minutes.

Outdoor Application:

When applying InvisaTread outdoors, it is important to note that the solution must not dry out during the curing process. The surface needs to be agitated with a moist sponge or more must be applied to keep surface from drying out until curing process is complete.
