

TerminatorTM Non-Foaming Algaecide

KEEP OUT OF REACH OF CHILDREN

CAUTION: See first aid statement and other precautions on back panel.

Controls the Growth of Algae in Swimming Pools and Spas • For All Pool Types

NET CONTENTS 32 FL. OZ (946 ml)

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Terminator is used to control the growth of algae in swimming pools, exterior spas, whirlpools and hot tubs. For maximum effectiveness pools, spas, whirlpools and hot tubs containing heavy growth of algae should be cleaned prior to using Terminator. For pools having just visible algae growth add an initial dose of 24 to 32 fluid ounces of Terminator per 10,000 gallons of water and remove settled algae debris by cleaning. For treatment of a freshly cleaned and filled pool add initially 13 to 24 fluid ounces of Terminator per 10,000 gallons of water. Subsequent additions of 4 to 9 fluid ounces of Terminator should be made every 5 to 7 days after initial treatment for maintenance.

Spas, whirlpools and hot tubs having just visible algae require an initial dose of 2 to 4 ounces of Terminator per 1,000 gallons of water. Subsequent additions of 0.5 to 0.8 fluid ounces of Terminator should be made every 5 to 7 days after initial treatment for maintenance. Terminator will prevent growth of most algae during the off-season winter months when pools are not in use. For pools, which have been properly treated during the swimming season and are free of visible algae, add 13 to 21 fluid ounces of Terminator per 10,000 gallons of water. If at the end of swimming season pools have some visible algae growth, add 25 to 32 fluid ounces per 10,000 gallons. It is necessary that a uniform distribution of algaecide, throughout the water and the pool be made for maximum effectiveness. If pool is not covered, it may be necessary to repeat the treatment one or more times during the season.

Terminator is compatible with those chemicals normally used to treat pools and spas and is effective at both acid and alkaline pH. Terminator can be used in pools and spas treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix Terminator with concentrated dry or liquid chlorine products.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling.

IE IN EVEQ.	FIRST AID	
<u>IF IN EYES:</u>	Hold eye open and rinse slowly and gently with water for 15-20 minutes.	20 0 7
	Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eve. Call a poison control center or doctor for futher treatment advice.	
IF ON SKIN:	Take off contaminated clothing. Rinse skin immediately with plenty of water for
